

Product introduction

Try for yourself

**Precision edges guarantee
burr-free drilling!**

Prototypes available now!

Material: Glass fiber GF + carbon fiber CFRP

Material: CFRP + aluminum

Material: CFRP (90° cross)

Material:

Aramid fiber FRP

Composite Solution

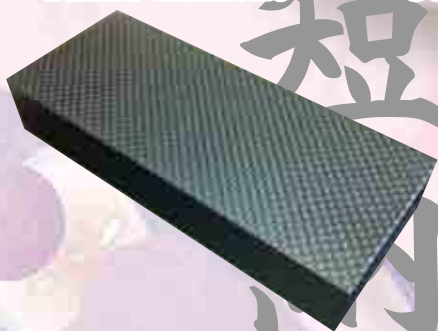

SANKO is a maker of industrial cutting tools and grinding tools specializing in tool design, manufacture, repair, restoration, and regrinding. We also provide machine parts, and offer jig manufacturing, machining, and repair services employing a comprehensive range of equipment including NC machine tools, machining centers, wire cutting and brazing equipment, high-precision polishers, tool grinders, profiling machines, and inspection machines. The latest additions to our product lineup include drilling tools for CFRP composite materials, router bits for deburring and delamination, and a special coating for extending tool life. Please contact us to discuss new product development, custom tools, and quick-delivery trial manufacturing.

Representative Hirotaka Morishima, President

Founded November 1978

Capital JPY 10 million

Sales JPY 200 million

Employees 18

Major Customers Kanefusa Corporation
Nagoya Diamond Ind Co.,Ltd
TAP Maintenance&Engineering(Portugal)

Contact Person Mr. Hirotaka Morishima

Major Line of Business

- Development, production and sales of industrial cutters, cutting tools
- Tool repairs, tool play, re-brazing and regrinding of industrial cutters, cutting tools
- Coating service
- Processing machinery parts, jig

SANKO

Our Strengths

Wide variety, small-lot

Speed

- Anti-fuzz
- Prevent delamination
- Burr prevention

High-precision machining

Inspection
Cutting test

Safety

Specialized coating

Anti-friction, Anti-abrasion resistance

We have experience in various industries

Quality Assurance

Design, Development

Feedback

Special cutting tool
